

Free Laser Eye Screening

By submitting this form, I confirm that I have read and understood the following information regarding the free laser eye screening at Johannesburg Eye Hospital:

AGE REQUIREMENT

The free laser eye screening is available to individuals aged 55 years and younger.

SCREENING PURPOSE

The free screening consists of a series of eye scans and tests to determine whether I may be a suitable candidate for laser eye surgery.

Completing the screening does not guarantee that I will qualify for laser eye surgery.

CONTACT LENSES

If I wear contact lenses, I understand that they must be removed for 7 days before my screening to ensure accurate test results.

SCREENING DURATION AND DRIVING

The screening takes approximately 20 minutes. My pupils will not be dilated during the screening, so I should be able to drive afterwards.

FURTHER ASSESSMENT

If the initial screening indicates that I may be suitable for laser eye surgery, I will need to undergo a consultation and additional specialised assessments with one of the hospital's surgeons before my suitability for surgery can be confirmed.

LASER PROCEDURES

Johannesburg Eye Hospital offers the following laser procedures:

- PRK
- Femto LASIK
- SMILE
- CAIRS
- ALLOTEX

**PROCEDURE COSTS**

I understand that the cost of laser eye surgery typically ranges in the region of R40000.00, excluding the surgeon's consultation fee.

MEDICAL AID

I understand that medical aids generally do not cover the cost of the laser eye surgery procedure itself. Some medical aids may contribute towards the initial consultation or assessment, depending on my individual benefits.

BOOKING AND CONTACT

I understand that, due to the volume of enquiries, it may take up to one week for the Laser Centre team to contact me regarding my screening request.

If I would like to arrange my appointment sooner, I can contact the Laser Centre directly on 011 782 1080 ext. 1024 during operating hours.

OPERATING HOURS

Monday to Thursday: 07:00 – 15:00

Friday: 07:00 – 12:00
